- *mundo multipolar*

Abstract

The world economy is not yet fully recovered yet after the occurrence of the last financial crisis in 2008, which began in United States, was accentuated in Euro Zone and spread across the globe. If we add geopolitical and economic tensions arising from a multipolar world, short term perspectives are not expected from historical analysis of statistics series. Analyzing the dynamic of these aspects is the main goal of this paper.

Keywords

- *financial crisis*
- *economic growth*
- *multipolar world*
